

## Infrastructure Committee

### Goal

The San Diego region develops and implements an infrastructure investment that assures global access to the people, markets, and resources necessary for increasing prosperity, and by so doing, builds industry clusters around sustainable transportation, energy, and water technology.

### Recent Achievements

- Identified specific challenges within each of the water, housing, and environmental areas and divided the committee into focused subcommittees.
- Developed six Policy Target Reports to establish baseline facts with which EDC can begin to build consensus within the business community, implement an action plan, and adopt specific policy initiatives going forward.
- EDC Board and Infrastructure Committee adopted 2009-2010 action plans.
- Adoption Infrastructure Charters consisting key policy initiatives in each of the six areas of focus.
